## KEYNOTE SPEAKERS

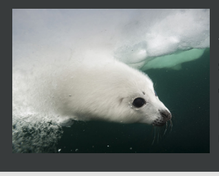

### David Doubilet & Jennifer Hayes

World-renowned National Geographic photographers and conservationists who have spent decades documenting the beauty and fragility of the world's aquatic environments.

David brings five decades of ocean photography to his work, while Jennifer's background as an aquatic biologist gives their storytelling a deep scientific foundation. Together, they collaborate on assignments spanning the globe.

From tropical coral reefs to polar ice, united by a shared passion for science, conservation, and the preservation of our planet's most precious ecosystems.
